Statistics Branch

PART I — AGRICULTURAL STATISTICS

The gross value of agricultural production in Ontario in 1936 amounted to \$354,380,000 which was a gain of \$40,000,000 over the previous year, and more than \$100,000,000 greater than in 1932, when production was valued at only \$247,684,000. The rise since 1932 has done much to lessen the hardships suffered by the farming community during the worst years of the depression. An improvement in the gross value of agricultural production was recorded in 1936 by all provinces, but it is interesting to note that Ontario led with an increase of nearly \$40,000,000, followed by Saskatchewan having a gain of \$22,000,000, Manitoba \$18,000,000, and Quebec about \$15,000,000. The Province of Ontario contributed one-third of the total agricultural production of all Canada.

The gross value of agricultural commodities produced on Canadian farms in 1936 was estimated at \$1,061,624,000, this represents an increase of \$112,084,000 over the estimate for 1935, and is \$294,830,000 or 38.4% higher than the depression low established in 1932.

The gross annual agricultural revenue of Ontario for the years 1931 to 1936 is set out in the table below. The estimates for 1936 are preliminary and subject to revision. No allowance has been made in these calculations for the portions of crops used for seed and in the feeding of live stock. Because of these duplications the totals represent gross values.

GROSS ANNUAL AGRICULTURAL REVENUE OF ONTARIO, 1932-1936

The rise in grain prices accounted to a very large extent for the improvement in revenue recorded by Ontario. Although the volume of field crop production was down approximately 10%, the total value rose from \$132,086,000 in 1935 to \$162,332,000 in 1936, an increase of slightly more than \$30,000,000. Income from live stock was only moderately higher at \$46,732,000 as compared with \$43,344,000 for the previous year. Dairy products rose from \$85,132,000 to \$91,282,000 and poultry and eggs from \$20,915,000 to \$22,939,000. The value of clover and grass seed rose from \$710,000 to \$1,442,000 showing a gain of more than 100%. The production of fruit and vegetables, tobacco and honey was curtailed by unfavourable weather conditions during the summer of 1936 and the revenue from each of these items was somewhat lower.

The rise in grain prices after harvest was the outstanding feature of the agricultural situation in 1936.

The total acreage devoted to the principal field crops amounted to 9,119,000 acres in 1936 as compared with 9,106,000 acres in 1935. The per acre yield was reduced by a period of prolonged drought and intense heat which lasted from mid-June to mid-August. Spring grains suffered considerably in the central counties of the Province and particularly those bordering on Lake Ontario and Lake Erie. Pastures were burned up and large numbers of dairy farmers were forced to stable-feed their herds in mid-summer. Second crop hay yields were also reduced. In Essex and Kent and Eastern Ontario counties moisture was more plentiful and good crops were harvested. The general situation was improved materially by cool, moist weather after September 1st, and a prolonged open fall. Pastures improved tremendously and enabled farmers to conserve their feed supplies. Root crops developed well and yield per acre exceeded that of 1935. Production of grass, hay

and clover seeds was considerably below normal and was cleaned up at good prices by a strong demand from both domestic and foreign sources. The combined production of wheat, oats, mixed grain, barley and rye amounted to 126,949,000 bushels as compared with 151,725,000 bushels in 1935, and a previous ten-year average of 155,725,000 bushels. The total yield of hay crops (hay and clover, alfalfa, alsike and sweet clover) was 6,156,000 tons as compared with 6,907,000 tons in the previous year and 6,664,000 tons during the ten-year period 1925-1934.

The sheep population showed a further decline with the number of sheep and lambs on farms in June estimated at 886,500 in 1936 as against 945,700 in the previous year. Hog numbers showed a large increase at 1,408,300 as compared with 1,225,300 in 1935. In the fall months there was indication that farmers were commencing to again increase their sheep flocks but cutting down somewhat on sow breedings, due to the scarcity of grain in some sections and the high price of feedstuffs. Horses, cattle and poultry were practically unchanged in population from the previous year. The price trend in animals and animal products in 1936 was mixed. Cheese, sheep and lambs, dairy cattle, calves and horses sold at considerably higher levels than in 1935, while butter, poultry and eggs sold at only slightly higher prices, and whole milk was unchanged. The 1936 yearly average of prices for the two most important classes of live stock, beef cattle and hogs, was lower than in 1935.

Volume of dairy products was somewhat higher in 1936 in spite of the unusually dry summer and poor pasturage. The total production of butter increased 2.2 per cent and cheese 16.3 per cent. Compared with ten years ago the production of butter in Ontario shows a large increase, whereas the make of cheese has declined considerably. Production of creamery butter in 1926 was 62,500,000 pounds and in 1936, 86,250,000 pounds, while the make of cheese which amounted to 119,400,000 pounds in 1926 had fallen to 87,800,000 pounds in 1936. Canadian cheese holds an unequalled position on the British Market and it is to be hoped that the favourable prices which prevailed in 1936 may continue during 1937, and that cheese production will show another substantial increase. Considerably larger shipments of cheese were exported to the United Kingdom in 1936, and also to the United States which took more than ten million pounds of Canadian cheddar cheese as compared with less than one-half million pounds in 1935. The summer of 1936 was a trying one for the dairy farmers in the central and western sections of the Province. The extreme heat and the prolonged drought period resulted in a shortage of pasture, scarcity of green feed and poor quality concentrates for winter feeding.

The position of Canadian farmers in respect to their ability to purchase goods is set out graphically in the chart below. The hatched sections indicate the years when prices of agricultural products were below prices of manufactured goods in terms of their relationship for the year 1913. From 1922 to 1925, and again from 1930 to the fall of 1936, farmers secured a smaller quantity of manufactured goods in exchange for their agricultural products than in 1913. In the fall of 1936 agricultural prices rose rapidly and reached the point where again, as in the years 1913 to 1921 and 1925 to 1929, a given quantity of farm products purchased more implements, machinery, clothing, household articles, etc., than in the year 1913, which is usually considered a normal year. At the lowest point of the depression, farmers found it very difficult to purchase needed goods

as the prices of manufactured products had declined only about 30% from the 1929 level, whereas prices of farm produce had fallen by more than 60%. The improved relationship which now exists between these two sets of prices will make it possible for farmers to catch up on some of their needed purchases.

The index of prices of farm products rose sharply during 1936 and by the end of the year farmers were able to buy a slightly larger volume of manufactured goods for a given quantity of agricultural produce than in the year 1913. Periods of prosperity usually occur when the line representing farm prices in the above chart is above the line representing manufactured goods.

THE WEATHER

TEMPERATURE.—The following table gives the temperature of the Province for each month during the last five years, together with the mean annual temperature for the six months, April–September, practically the growing season, together with the average for the five years, 1932–1936, and fifty-five years, 1882–1936.

Months	1936	1935	1934	1933	1932	1932- 1936	1882- 1936
	°	°	°	°	°	°	°
January.....	16.1	15.1	21.4	28.6	31.1	22.5	17.8
February.....	11.1	18.1	5.4	21.3	24.7	16.1	17.6
March.....	31.0	31.4	24.0	27.9	25.7	28.0	27.7
April.....	37.2	41.1	39.6	43.1	38.1	39.8	41.5
May.....	56.2	48.9	55.5	55.1	54.2	54.0	53.5
June.....	62.3	61.6	65.5	66.0	63.7	63.8	63.5
July.....	69.2	71.5	68.4	70.0	66.0	69.0	68.2
August.....	66.1	67.5	63.3	67.3	67.7	66.4	65.8
September.....	59.8	56.2	62.2	61.8	59.8	59.9	58.9
October.....	45.9	47.4	46.4	46.2	49.2	47.0	47.5
November.....	30.1	36.3	40.4	27.7	32.5	33.4	35.3
December.....	26.2	18.5	19.6	18.4	26.2	21.8	33.5
Annual Mean.....	42.6	42.8	42.6	44.5	44.9	43.5	44.2
Mean for six months April-September.....	58.5	57.8	59.0	60.5	58.3	58.8	58.6

The mean temperature for 1936 was 42.6 degrees or 0.2 degree lower than preceding year, and 1.6 degree above the normal of the fifty-five years, 1882-1936.

The mean of the six months, April-September, was 58.5 or 0.7 degree above preceding year and 0.1 degree below the fifty-five year normal.

Six months were above normal and six below with March having the greatest departure above with 3.3 degrees, and February the greatest below with 6.5 degrees.

SUNSHINE.—In the following the averages of sunshine are derived from the records of the weather stations at Woodstock, Toronto, Lindsay, Kingston and Ottawa.

Months	Sun above horizon	1936	1935	1934	1933	1932	1932- 1936	1882- 1936
	hrs.	hrs.	hrs.	hrs.	hrs.	hrs.	hrs.	hrs.

November.....	286.9	92.0	63.0	61.1	76.8	107.9	80.1	77.7
December.....	274.3	82.2	69.0	65.6	67.3	74.1	71.6	63.2
For year.....	4474.4	1955.0	2004.7	2003.6	1965.2	1932.4	1972.1	1943.0
For six months April-Sep- tember.....	2614.9	1371.8	1381.0	1400.2	1367.4	1347.9	1373.7	1339.9

The year 1936 had 1,955.0 hours of sunshine, 12.0 hours more than the average for the last fifty-five years. The six growing months, April-September, had

1,371.8 hours or 31.9 more than the average. Seven months were above normal and five below. July had the greatest departure above with 50.1 hours and April the greatest below with 66.5 hours.

PRECIPITATION.—The fall of both rain and snow for the five winter months including November, 1935, and March, 1936, is given in the following table for five years, together with the average for the fifty-five years, 1882–1936. Ten inches of snow is equivalent to one inch of rain.

Months	1936	1935	1934	1933	1932	1932–1936	1882–1936
	in.	in.	in.	in.	in.	in.	in.
November, 1935:							
Rain.....	2.59	2.88	1.59	2.12	2.85	2.41	2.02
Snow.....	6.1	4.0	20.8	11.5	2.4	9.0	7.5
December, 1935:							
Rain.....	0.41	0.37	1.20	1.73	1.57	1.06	1.19
Snow.....	15.5	18.2	20.5	11.8	8.6	14.9	15.3
January, 1936:							
Rain.....	0.28	1.06	0.78	0.97	2.56	1.13	0.92
Snow.....	20.5	21.5	14.7	6.8	13.2	15.3	18.7
February, 1936:							
Rain.....	0.37	0.53	0.00	0.64	1.11	0.53	0.68
Snow.....	19.6	12.7	12.4	16.3	14.5	15.1	15.4
March, 1936:							
Rain.....	1.82	1.06	1.31	1.20	0.50	1.18	1.18
Snow.....	17.9	8.1	12.1	11.7	19.2	13.8	11.1
Five Months:							
Rain.....	5.47	5.90	4.88	6.66	8.59	6.31	5.69
Snow.....	79.6	64.5	80.5	58.1	57.9	68.1	68.0

The total amount of rainfall for the five months was 5.47 inches or 0.22 below the average for the fifty-five years, 1882–1936. The total amount of snowfall was 79.6 inches or 11.6 inches above normal.

The rainfall for the six months, April–September, comprising what is regarded as the growing season for most crops, is given in the following table covering the last five years, 1932–1936, and the normal for the fifty-five years, 1882–1936.

Months	1936	1935	1934	1933	1932	1932–1936	1882–1936
	in.	in.	in.	in.	in.	in.	in.
April.....	1.95	1.30	2.02	2.53	1.49	1.86	1.88
May.....	1.16	1.90	1.19	2.66	2.53	1.89	2.67
June.....	2.64	4.31	2.96	1.94	1.94	2.76	2.82
July.....	1.34	3.14	1.99	1.77	3.52	2.35	2.85
August.....	2.37	1.89	1.89	2.74	4.03	2.58	2.62
September.....	3.85	2.84	4.34	2.50	3.71	3.45	2.79
Total for six months...	13.31	15.38	14.39	14.14	17.22	14.89	15.63

The rainfall for the six months, April–September, was 13.31 inches or 2.07 inches below preceding year, and in comparison with the fifty-five years 2.32 below. Two months were above normal and four below. September with 1.06 above and May and July 1.51 below had the greatest departures during the growing season.

TEMPERATURES, 1936

TABLE I.—Showing for each month the highest, lowest, mean daily range and mean temperature at the principal stations in Ontario for 1936; also the annual mean for each station.

Total:						
All occupations.....	37,133	40,072,890	33,287	38,655,794	32,639	38,045,494
Farmers as given.....	8,982	18,255,547	9,545	19,327,824	10,647	19,831,625
*Occupations not given.....	16,264	7,857,542	13,876	6,573,676	12,840	6,266,597

*A number of these may be "farmers." Nearly every clerk reports a number of instruments as unclassified as to occupation. Certain finance corporations have adopted the practice of filing chattel mortgages instead of liens on automobiles. This is very noticeable in Essex and Middlesex Counties (included in unclassified).

PART III.

Comparative Farm Statistics for
Fifty-Five Years—1882-1936

STATISTICS OF FARM CROPS
FALL WHEAT AND SPRING WHEAT

The following table gives the area, produce and market value of fall wheat and spring wheat for the years 1882 to 1936, together with the annual averages for the various periods of ten years and the average for the fifty-five years.

Years	Fall Wheat				Spring Wheat			
	Acres	Bushels	Per acre	Market Value	Acres	Bushels	Per acre	Market value
				\$				\$
